

ULTRA-FRESH

ANTIMICROBIAL TREATED WINDOW BLINDS

LOUVOLITE
COMMERCIAL

PROVEN PROTECTION

FABRICS WITH ULTRA-FRESH*

Keeping window blinds fresh and clean is a necessity in commercial sectors - especially healthcare institutions.

Louvolute offer fabrics that prevent unwanted microbial growth with the addition of Ultra-Fresh.

When treated with Ultra-Fresh the fabric provides proven protection against the growth of odour causing bacteria, fungi, mildew and moulds. It also prevents stains that can be caused by bacteria and fungi resulting in fabric that is fresher and cleaner for longer.

With a wide range of light filtering and blackout fabrics available, it makes sense to choose Louvolite window blinds treated with Ultra-fresh where health and well-being is a priority.

*Ultra-Fresh® is a registered trademark of Microban Products Company.

Carnival Blackout Luna

Carnival Eden

Vermont Cotton

Ultra-Fresh treated window blinds are easy to maintain and will preserve their antimicrobial properties even after cleaning.

Carnival China White

Carnival Terracotta
